FOR IMMEDIATE RELEASE

Biotechnical Integrated Group Chooses CyberMetrics Corporation for Integrated Services Management Solution

SCOTTSDALE, Ariz. – Dec 30, 2004 – CyberMetrics Corporation, a leading provider of quality asset management and industry compliance solutions was chosen by the Biotechnical Integrated Group (B.I.G.) to offer the biopharma industry’s most complete service management solution. Over the last 10 years, CyberMetrics has been a leader in gage calibration software as well as equipment maintenance software and is leveraging that success to provide high value solutions that provide rapid return on investment in the facility management industry.

“The selection process we went through was rigorous and based on several key areas, including size of the company, how long in business, innovation in their product/service/technology, number and type of clients, and competitiveness in the industry,” said Bob Nugent, Operations Director for B.I.G affiliate; Biotechnical Services Inc. of San Diego, California. “We are excited about choosing CyberMetrics and look forward to the gains in efficiency and automation provided by their software. Our customers need a true one-stop-shop for services so they can get on with their work in research and development. CyberMetrics really completes the BIG picture.”

“CyberMetrics Corporation looks forward to providing solutions with BIG,” states Perry Parmely, Director of Sales and Marketing. “This combination between GAGetrak/FaciliWorks and Biotechnical Integrated Group will provide tremendous value to the marketplace.”

Relationship Overview

The Biotechnology Integrated Group was formed in 2004 as a national co-op of service and support providers for the pharmaceutical, biotechnical, clinical, and academic life sciences market. Within its membership, B.I.G. offers the industry cGMP services, facilities management, asset tracking, relocation, and laboratory equipment maintenance and repair. The partnership between B.I.G. affiliates and Cybermetrics allows optimization of the FaciliWorks facility management program as “turnkey” for the end-user. Equipment can now be inventoried and bar-coded with maintenance/calibration SOP’s for an entire facility, all on one platform. Utilizing the service groups and Cybermetrics for projects of this scope will now offer a more cost-effective alternative over established multiple vendor services in the biopharma marketplace.

About CyberMetrics Corporation

CyberMetrics Corporation is a leading provider of quality asset management and industry compliance solutions. CyberMetrics solutions reduce the risk, cost and time of facility management and gage calibration. CyberMetrics software provides out-of-the-box compliancy, historical reporting for trend analysis and increases control and visibility into existing operations helping to increase efficiency while reducing costs.
