

FaciliWorks® 7

Web Service Request

Submit service requests over the Internet from anywhere in your facility!

The FaciliWorks Web Service Request allows all authorized employees, with Internet access, to submit service requests directly to the Maintenance Department via your FaciliWorks 7 Desktop software. Once the electronic service request is approved by your maintenance manager, it can be converted into a Work Order and the job is completed. The FaciliWorks Web Service Request can accommodate as many employees as your company can hire.

Downtime costs your company time and money; reduce your costs and improve the efficiency of your maintenance department with the seamless, fast, and secure FaciliWorks Web Service Request!
