

# GAGetrak<sup>®</sup> 7 Preview

**GAGetrak – The World's #1 Installed Calibration Management Software Solution**

For over twenty years, GAGetrak has assisted thousands of companies worldwide to manage metrology assets, forecast workloads, reduce costs, provide compliance with calibration standards and improve profitability; while providing quick and easy software implementation. GAGetrak 7 is our latest and most advanced calibration software solution to date!

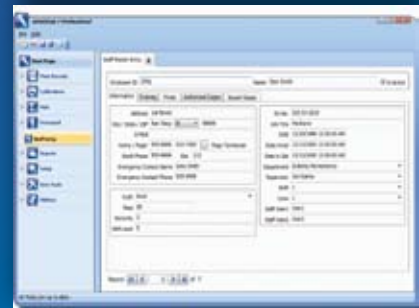

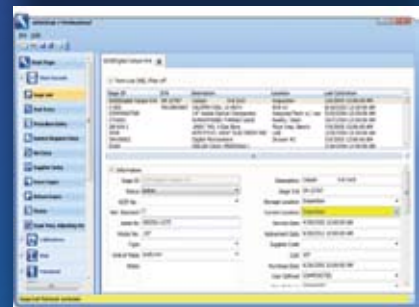

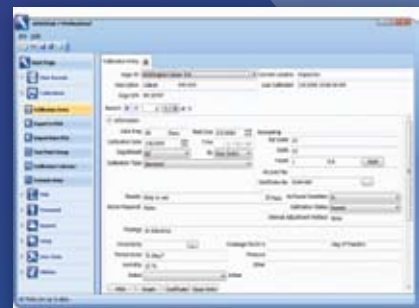

## **GAGetrak Benefits:**

- Ease of Use
- Comprehensive Monitoring
- Compliance Assurance
- Affordably Priced
- Gage R&R (Measurement Systems Analysis)
- 21 CFR Part 11 Compliant
- Microsoft SQL Server Compatible
- Calibration Procedure History
- Customizable Program Messages, Field Labels, & Reports
- Group Level Security & Passwords
- PDA Compatible
- On-site Training and Implementation Assistance (additional services)
- Faster than our GAGetrak 6 product

GAGetrak calibration management software allows you to better manage your workload, minimize overtime costs, maintain production schedules, and ensure customer approval and satisfaction.

## **GAGetrak 7 Features:**

Monitors scheduled and unscheduled calibrations, tracks gage locations, retrieves calibration records, generates work orders, produces calibration certificates, maintains equipment calibration, and provides thorough reporting for management analysis. The integrated gage R&R module supports short form, long form, linearity, stability, ANOVA, and attributes helping to maintain gage standards and calibration compliance.

### Some new GAGEtrak 7 Features include:

- Redesigned User Interface makes GAGEtrak even easier to use
- Customizable Drop-Down Lists
- Enhanced Support for Multiple Reference Standards
- Designate Fields as Required
- New database design uses SQL Server for increased reliability, security and scalability
- Developed using the latest .NET technology and standards

Customizable reports within GAGEtrak allow you to analyze and stay ahead of trends; providing valuable insights to ensure accurate forecasting of workloads, reduction of manufacturing costs, reduced product returns, and assures compliance with international calibration and vendor standards.

GAGEtrak is ISO 9000, QS 9000, ISO-ANSI 17025, ISO 22000, TS 16949, AS 9100 and FDA 21CFR Part 11 compliant and is designed to meet current gage standards for calibration compliance.

GAGEtrak is customizable and designed to grow with the ever-increasing needs of your organization, from a single user on one computer to several users on a local area network to hundreds of users at dozens of facilities.

The GAGEtrak application can be utilized as a stand-alone product or with Microsoft's SQL Server database to accommodate the largest of databases and the addition of many more users. Provide your company with additional flexibility and management tools by utilizing other options available with GAGEtrak - including: Validation Kit, GAGEtrak Enterprise Reporter, GAGEtrak Web Reporter, PDA Software, Calibration Label Printers, Custom Tool Kit, and CalPro Equipment Calibration Procedures.

CyberMetrics provides live technical support, consultation and implementation services, and customized on-site or public regional classroom training to ensure your company's successful implementation of the GAGEtrak 7 software solution.

With a track record of success spanning over twenty years, GAGEtrak 7 provides your company with the assurance and confidence of owning the best and most current version of the #1 installed calibration management software solution in the world!
