

# FaciliWorks® 8i Server

Enterprise Asset Management Software

## Product Options

### FaciliWorks Web Service Requests

FaciliWorks Web Service Requests improve the efficiency of your maintenance department by allowing an unlimited number of users in various locations to quickly create and submit service requests to a central maintenance department, eliminating time-consuming phone calls and written requests, while providing centralized documentation of every service request and its outcome.

### FaciliWorks PDA

Perform maintenance and inventory in the field with your PDA handheld computer, then transfer the data back to your FaciliWorks database.

You can even add a built-in laser bar code reader to scan labels printed by our Maintenance Label Kit. It's a great way to save data entry time and cut down on costly errors.

### FaciliWorks Maintenance Label Kit

Print durable, laminated, bar-coded labels directly from FaciliWorks. The small-footprint Brother printer comes with cables, design software and everything else you'll need to get started.

### TaskPro and SafetyPro

TaskPro is a fully customizable, comprehensive database of maintenance procedures covering 250 different topics related to facility and equipment maintenance and easily installs directly into your FaciliWorks database.

SafetyPro is a database of step-by-step safety checklists to assist with OSHA compliance. It covers 40 different topics including fire protection, stairs and stairways, hand tools and just about anything else you might need.

### Training

Three convenient and effective training options are available to fit your needs: personalized web training, two-day regional training and on-site training. Our talented instructors will guide you through the planning, preparation, setup and successful operation of FaciliWorks. You'll learn how to save time, avoid common mistakes and get the most out of your software.

### FaciliWorks 8i Calibration

#### Two Powerful Products. One Ground-breaking System.

FaciliWorks 8i Calibration combines all of the benefits of FaciliWorks 8i with the power of our GAGETrak® software, the world's leading calibration management software, to deliver an all-in-one enterprise asset management server solution. In addition to the asset management functions of FaciliWorks, 8i Calibration allows for gage entry, calibration scheduling, tracking of gage locations, retrieval of calibration records, production of calibration certificates and the ability to track the as-found condition of gages. You can schedule a PM and a calibration on the same asset, assign a gage ID as a standard and attach calibration certificates to procedure records.

### Validation Kit

FaciliWorks simplifies the validation process with its backup/restore feature, built-in referential integrity checks, field-level input validation, standard reports and a sample validation database for end-user testing and verification. And, because FaciliWorks 8i can incorporate calibration management, our 8i Calibration Validation Kit supports both CMMS and calibration to meet requirements for single-track FDA validation.

**Contact us today to learn how these products and services will further maximize your productivity with FaciliWorks.**
