

You just found the silver lining.

Enterprise Asset Management in the Cloud

As you research the world of cloud computing for your CMMS/EAM software, it's important to understand what you'll be getting for your monthly fee. The SaaS (Software as a Service) version of FaciliWorks 8i CMMS/EAM Software is a deeper, more sophisticated, more reliable product than others of its kind. And, unlike other providers, we stand behind our products and services every step of the way, from your initial consultation to deployment, data storage and delivery.

- Reduce IT hardware and data storage costs
- Eliminate time and money spent on software maintenance
- Improve scalability
- Minimize the cost of software licensing
- Deploy quickly and effortlessly

Cloud computing is simply the delivery of business software over the Internet. FaciliWorks 8i CMMS/EAM Hosted software is easily accessed through your Internet browser, so no time is spent installing it on multiple workstations or your local server.

You don't have to be concerned about operating system requirements, hardware, drive space or database systems and you don't have to incur the cost associated with these things or spend time on set-up and maintenance. We take care of everything behind the scenes: software installation, software updates and the secure storage of your database. Real-time access to the most current data ensures time and cost efficiency throughout your operation.

Because FaciliWorks 8i Hosted can be accessed for a small monthly subscription fee, cloud computing is the perfect solution for new facility start-ups, those with limited IT budgets, organizations without in-house IT expertise and even larger companies that need to

roll out to multiple locations. If you have a mobile work force, cloud services are the perfect way to allow them to access the system from anywhere.

Are My Transactions Secure?

Yes. We use Secure Sockets Layer protocol (SSL) to facilitate encrypted data exchange. This means your data is completely encrypted while transmitting via the Internet. This is the same type of technology online credit card processing, banking and government agencies use to ensure secure exchange of data via the Internet.

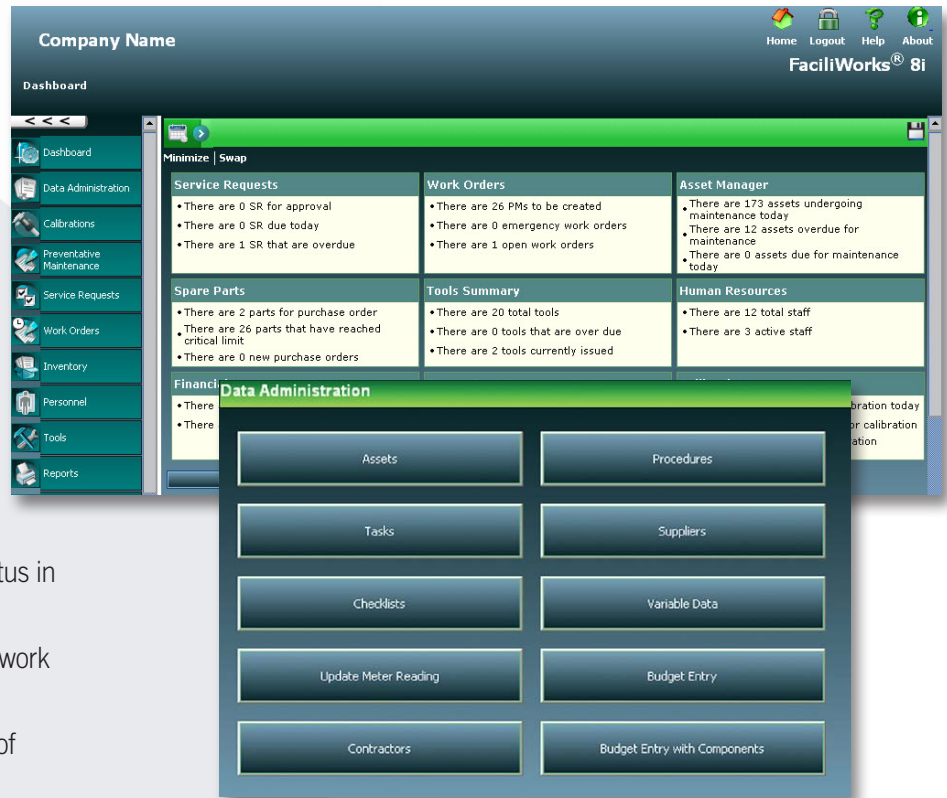

Is My Data Secure?

Yes. We use state-of-the-art datacenters which all hold the prestigious SAS 70® certification. This certification is issued via a third-party audit, designed to ensure that best practices in hosting security and datacenter process and control are in place. Currently, our 8i CMMS/EAM Cloud customers include Fortune 100 companies, Government agencies, FDA-regulated businesses, churches and schools.

Why Choose FaciliWorks?

FaciliWorks 8i CMMS/EAM software is the highest quality web-based software product available for the facilities maintenance marketplace. Easy to implement, easy to use and affordably priced, FaciliWorks 8i will help you reduce maintenance costs, improve productivity and ensure greater asset uptime.

- View your operations and asset status in real time with dashboard analytics.
- Easily submit, queue and manage work orders and service requests.
- Customize the comprehensive set of reports to fit your specific needs.
- Use the workflow management system to define tasks, triggers and notification events.
- Use calibration scheduling and analysis for your measurement and test equipment. (8i Calibration)
