

GAGEtrak[®] FastTrak

The World's Leading Calibration Management Software
Simplified.

You're still using standard spreadsheets and index cards to track and record your company's calibration records and you want to make the leap to calibration management software, but you're overwhelmed by it - it's too much! You need it to be simpler and more straightforward. You don't need all of the fancy frills, just the basics. GAGetrak FastTrak provides all the basics you need and it's a speedy solution that will fit any budget.

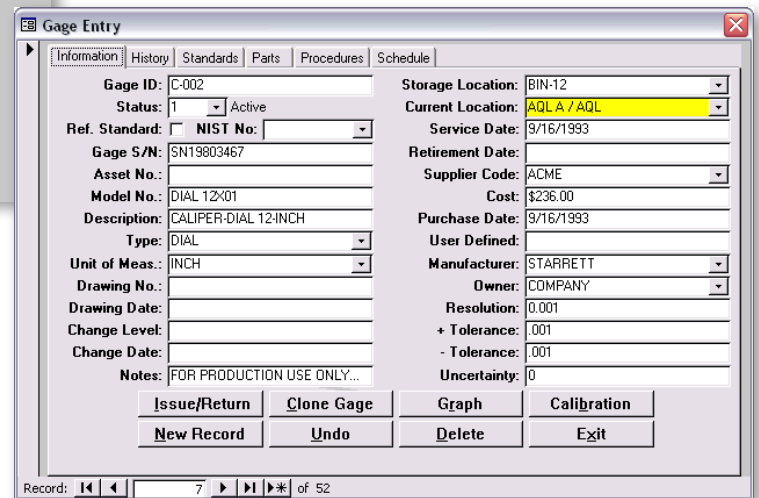

With GAGetrak FastTrak, you can:

- Track gages
- Set calibration due dates automatically or manually
- Calculate uncertainty
- Access calibration history
- Access calibration procedures
- Track issue/return
- Utilize traceability
- Organize, reference and flag gage measurements and specifications
- Control and assign access level rights

GAGetrak FastTrak employs the Outlook-style menu system for quick and easy access to your records and reports. The built-in security system provides simple, but effective control of who has access to your records and the rights that they will have. With dozens of essential reports to choose from, you'll always be informed on the calibration status and location of your measurement equipment.

If, in the future, you decide you need any of the functionality/capabilities listed below, then be sure to try out the full version of GAGetrak.

- MSA 4th edition gage R&R studies
- Field level security (User ID and password management)
- Extended, customizable reports
- Usage-based calibration scheduling
- Standards and measurement groups
- Advanced audit log (21 CFR Part 11-compliant)
- Customizable (translatable) program messages, field labels, reports, tabs, etc.
- Gage kitting
- Training

Making the leap to calibration software is quick and easy and our technical support team is always available to help. Using GAGetrak FastTrak instead of spreadsheets and index cards will improve efficiency, help you avoid common mistakes and reduce costs.

Contact us today for free trial of GAGetrak FastTrak or a personalized web demonstration. You'll see how simple it is to get your company on the right track... fast.
